

Barefoot Bodywork - 2021 C19 Vaccine Exclusion Policy

****Subject to change as required****

To insure the safety of our practitioners and clients, Barefoot Bodywork asks that clients please wait 30 days before booking treatments after taking any experimental mRNA injections. This is due to the unknown short and long term health effects and in particular the lack of information about its potential shedding period.

This decision has been made with respect to our insurance as well as the advice of health professionals. The unknown and known side effects of the mRNA injections may not be covered by our liability.

We have also taken into account the reported and listed side effects including spike protein shedding, seizures, interruption to menstrual cycles, flooding, bruising, skin blisters, blood clots, Bell's Palsy and death.

We are deeply sorry for any inconvenience however the safety of our practitioners and clients are our paramount concern.

We will re-evaluate our policy when clinical trials of the experimental injections are completed in 2023, or as new information becomes available.

If you need any further information about the injections, please visit Pfizer, AstraZeneca and Covid-19 Vaccination Adverse Events and Reactions Feedback Australia on Facebook.

As a practitioner, mother and health advocate, I will not be taking any of the vaccines/experimental injections as I do not consent to these medical procedures.

As a client, you have the right to chose a practitioner that aligns with your beliefs and therefore I am openly sharing my position so that you may make an informed choice.

I will always support your freedoms and your right to choose.

If you would like a referral to a vaccinated practitioner I will respectfully assist you in finding the right person for you.

If you would like more information on the reasons for this decision, please feel free to contact me directly and I would be happy to share resources with you.

With gratitude & understanding,
Kylie (Owner)
